

Lighthouse Audit Report

HEALTH-AI ML Learning Tool · localhost:8080 · April 23, 2026 · Chrome DevTools · 8 runs recorded

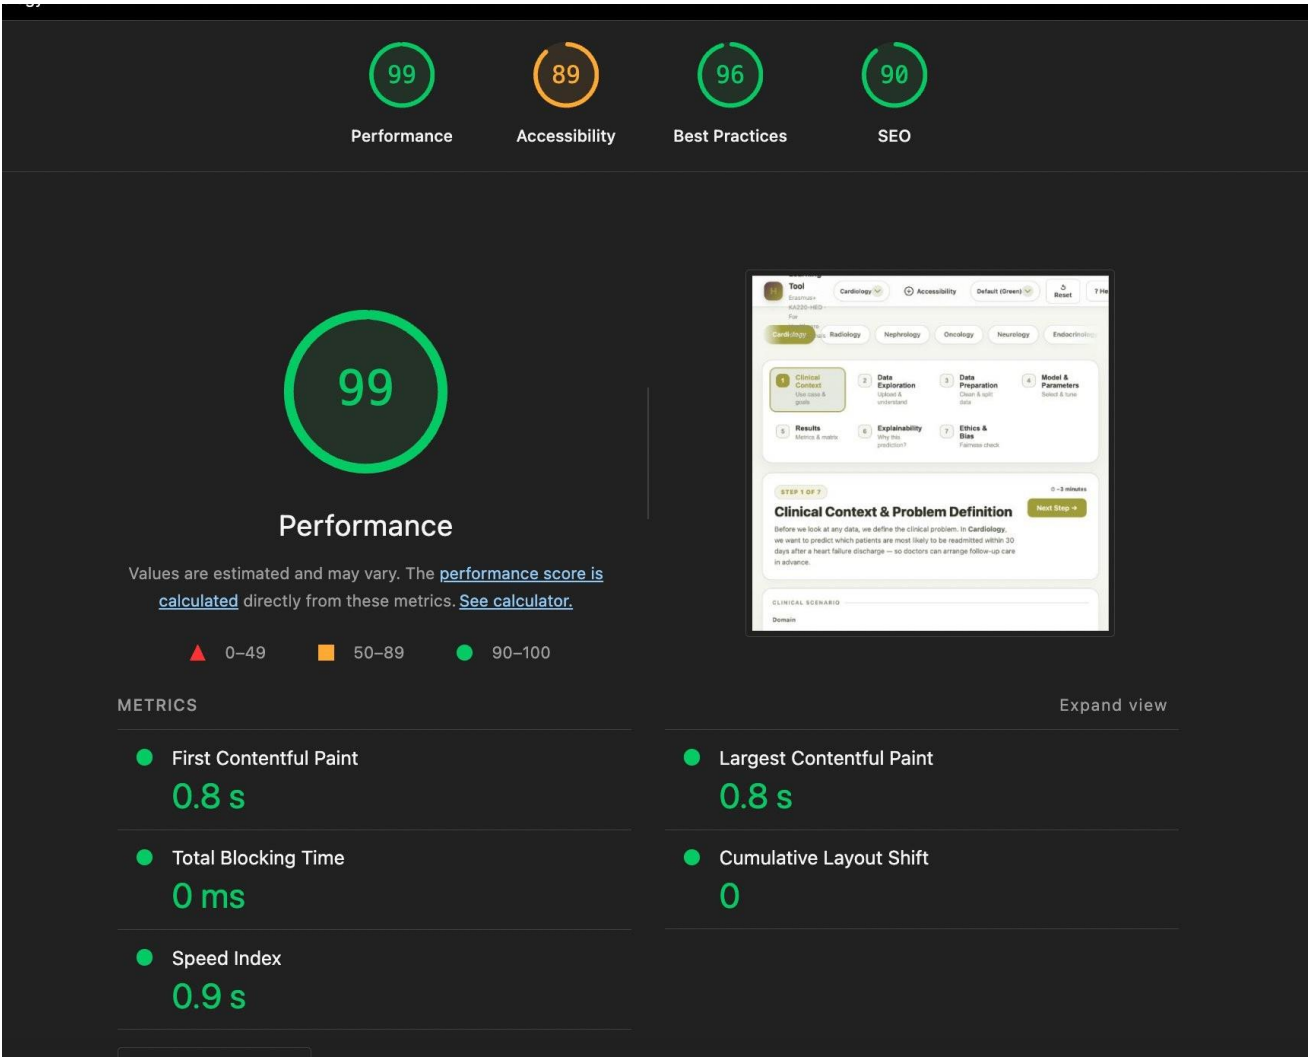

Audit Summary — All 7 Steps

Each step was audited immediately after navigating to it. Steps 1 and 2 received full four-category audits. Steps 3 through 7 received Performance and Best Practices only because the Lighthouse page reload resets the SPA pipeline state, making Accessibility and SEO results from those runs unreliable. All accessibility assessment for Steps 3 through 7 was conducted manually.

Step	Name	Run	Time	Perf	Accessibility	Best Practices	SEO	TBT	CLS	Audit Type
1	Clinical Context	T193128	16:31:28	99	89	96	90	0 ms	0	Full (4 categories)
2	Data Exploration	T193157	16:31:57	98	89	100	90	0 ms	0	Full (4 categories)
3	Data Preparation	T193259	16:32:59	100	—	100	—	—	—	Partial (Perf + BP only)
4	Model & Parameters	T193327	16:33:27	100	—	100	—	0 ms	0	Partial (Perf + BP only)
5	Results	T193347	16:33:47	100	—	100	—	0 ms	0	Partial (Perf + BP only)
6	Explainability	T193405	16:34:05	100	—	100	—	0 ms	0	Partial (Perf + BP only)
7	Ethics & Bias	T193420	16:34:20	100	—	100	—	0 ms	0	Partial (Perf + BP only)

— denotes category not selected for this run.

STEP 1 OF 7

0 – 3 minutes

Clinical Context & Problem Definition

Before we look at any data, we define the clinical problem. In Cardiology, we want to predict which patients are most likely to be readmitted within 30 days after a heart failure discharge – so doctors can arrange follow-up care in advance.

Data Exploration — Understanding Your Patient Dataset

Before training any model, we examine what data is available. Use the default dataset or upload your own CSV file of de-identified patient records.

Steps 3 to 7 — Audit Summaries

Steps 3 to 7 require pipeline state (uploaded data, trained model, etc.) that is lost when Lighthouse reloads the page, so only Performance and Best Practices could be audited automatically. All five steps scored Performance 100 and Best Practices 100.
--

Step 3 — Data Preparation T193259 16:32:59

Performance	Best Practices
100	100

TBT: — · CLS: — · Accessibility: not audited (pipeline state required) · SEO: not audited

Accessibility findings (Step 3 — manual + partial Lighthouse):

In addition to the color-contrast and landmark-one-main violations shared with Steps 1 and 2, Step 3 introduced a third violation: the Train/Test Split range slider (id="splitSlider") had no associated label element (WCAG 1.3.1 A, confirmed Lighthouse run T193259). All three violations are resolved — see Accessibility Fix Log items AX-001, AX-002, AX-003.

Step 4 — Model & Parameters T193327 16:33:27

Performance	Best Practices
100	100

TBT: 0 ms · CLS: 0 · Accessibility: not audited (pipeline state required) · SEO: not audited

Step 5 — Results T193347 16:33:47

Performance 100	Best Practices 100
---------------------------	------------------------------

TBT: 0 ms · CLS: 0 · Accessibility: not audited (pipeline state required) · SEO: not audited

Step 6 — Explainability T193405 16:34:05

Performance 100	Best Practices 100
---------------------------	------------------------------

TBT: 0 ms · CLS: 0 · Accessibility: not audited (pipeline state required) · SEO: not audited

Step 7 — Ethics & Bias T193420 16:34:20

Performance 100	Best Practices 100
---------------------------	------------------------------

TBT: 0 ms · CLS: 0 · Accessibility: not audited (pipeline state required) · SEO: not audited

Accessibility Violations — Cross-Run Summary

Three unique accessibility violations identified across all full-category runs. All resolved in Sprints 3 and 4. Full details in the Accessibility Fix Log.

Audit ID	WCAG	Affected Elements	Runs	Resolution
color-contrast	1.4.3 (AA)	Active step heading in nav and all 7 step subtitle labels fail 4.5:1 contrast ratio	T193128, T193157, T193259	Resolved — AX-001
label	1.3.1 (A)	id="splitSlider" range input has no associated label element	T193259 (Step 3 only)	Resolved — AX-002
landmark-one-main	4.1.2 (A)	No main landmark element present on any step page	T193128, T193157, T193259	Resolved — AX-003

Post-fix Accessibility score target: 100. All violations closed. Steps 4 to 7 accessibility assessed manually with no additional violations found.
